## REASONS FOR ALLOWANCE

### *Allowable Subject Matter*

1. Claims 2-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

RE claim 6, the prior art of record, and in particular Ottensen et al (USPN 5,870,241), fails to teach or suggest a method of detecting a protrusion comprising obtaining an index signal specifying a standard attitude of the recording medium; generating a sine wave signal based on a period of the index signal the sine wave signal specifying an angle of rotation of the recording medium from the standard attitude of the recording medium.

RE claim 7, the prior art of record, and in particular Ottensen et al (USPN 5,870,241), fails to teach or suggest a method of detecting comprising generating a cosine wave signal based on a period of the index signal, the cosine wave signal specifying the angle of rotation of the recording medium from the standard attitude of the recording medium.

RE claim 13, the prior art of record, and in particular Ottensen et al (USPN 5,870,241), fails to teach or suggest a detecting apparatus comprising a function generating circuit designed to generate a sine wave signal and a cosine wave signal based on rotation of the recording medium; a first multiplying circuit designed to multiply a detection signal from an acoustic emission sensor by the sine wave signal so as to generate a first reference signal, the detection signal designating an elastic wave between a target object and a surface of the recording medium; and a second multiplying circuit designed to multiply a detection signal from the acoustic emission sensor by the cosine wave signal so as to generate a second reference signal;
